Summary

Full-stack and AI-systems developer with 2 internships across industry research, enterprise software, and international product teams. Engineered end-to-end ML pipelines, React-driven platforms, and cloud-deployed analytics tools. CGPA 9.44 at SRM IST; seeking a Software Developer role at the intersection of full-stack engineering and intelligent systems.

Technical Skills

Languages: C++, Python, Java, JavaScript, C, Dart

Frameworks & Libraries: React.js, Node.js, Express.js, Flask, Flutter, PyTorch

AI / ML: Machine Learning, Computer Vision, BLIP, Vision Transformer (ViT), LLM integration (Qwen)

Databases: MySQL, SQLite

Tools & Platforms: Git, Figma, Postman, REST APIs, VS Code, Android Studio, Linux

Experience

Research Intern — Samsung Electronics (PRISM Program)

Jul 2025 – Present

- Engineered a scalable data pipeline processing **12K+ images** with automated captioning via BLIP and event-based clustering, cutting manual annotation effort to zero.
- Integrated Qwen LLM to generate per-user relevance scores from image context, metadata, and behavioral signals, forming the scoring backbone of a personalized discovery system.
- Architecting a **multimodal Vision Transformer (ViT)** model fusing image features, GPS location, event labels, and user preference signals to rank content by predicted engagement.
- Designed the end-to-end ML pipeline from raw image ingestion through embedding, scoring, and ranked retrieval for production-scale deployment.

Full-Stack Intern — Tenet Networks Pvt. Ltd., India

Feb 2025 – Apr 2025

- Built a full-stack **Device Management System** (MERN + MySQL) enabling real-time tracking, activity logging, and report generation for enterprise device fleets.
- Designed relational schema and REST APIs to support efficient storage, retrieval, and filtering of device records across front-end and back-end layers.

Front-End Intern — Capital Maharaja Group (CMG), Colombo, Sri Lanka

Dec 2024

- Translated Figma blueprints into a production-ready React front-end for a Student-Faculty resource sharing platform, delivering pixel-perfect, responsive UI.
- Applied material design principles and component-driven architecture to improve usability and maintainability.

Projects

GitHub Project Intelligence Tool — Flask, GitHub API, Matplotlib

[Live Demo](#)  [GitHub](#) 

- Designed and deployed a cloud-hosted analytics platform that ingests live GitHub API data and scores repositories on a **normalized 0–100 scale** using logarithmic scaling to eliminate outlier distortion.
- Visualized contributor activity, commit velocity, and languages used, enabling data-driven project health assessment at a glance.

Non-Contact Friction Simulator — React, Chart.js

[Live Demo](#) 

- Built a physics-accurate interactive simulator modeling drag and magnetic inter-

action forces with **real-time Chart.js visualization** of system dynamics.

- Exposed 5+ tunable parameters via an intuitive control panel, making complex non-contact force behavior explorable without prior physics software experience.

Text-Based Adventure Game — Java, SQLite

[GitHub](#)

- Architected a branching-narrative game engine with **persistent player state** across sessions via SQLite, supporting multiple save slots and dynamic choice trees.

Mini Projects: Weather App, Tic-Tac-Toe, Portfolio Site

[GitHub](#)

Education

B.Tech, Computer Science and Engineering

Aug 2023 – May 2027

SRM Institute of Science and Technology, KTR, India

- CGPA: **9.44 / 10**

Certifications & Achievements

Hackathons: BuildWithIndia (Top 20%), Hack2Skill Google Solutions Challenge, Smart India Hackathon'25, SRM Ideathon Finale, Layers 24-Hour Hackathon [\[Proof\]](#)

2024–2025

Samsung PRISM Internship Certificate [\[Proof\]](#)

Jul – Dec 2025

Machine Learning — Stanford University / DeepLearning.AI [\[Proof\]](#)

Mar 2025

NPTEL: Introduction to Machine Learning [\[Proof\]](#)

Sep 2025

NPTEL: Introduction to Database Systems [\[Proof\]](#)

May 2025

Postman Student Expert [\[Proof\]](#)

Feb 2025

GirlScript Summer of Code — Open Source Contributor [\[Proof\]](#)

2024

Cisco Networking Basics — Cisco Networking Academy [\[Proof\]](#)

Oct 2025
